- **TOTAL PRIVACY WITH CLEAN AND PROFESSIONAL APPEARANCE**

100% visual barrier with optional sound reduction.

- **EASY INSTALLATION**

Installation services or training with full installation procedures for fencing contractors.

- **MANUFACTURED IN CANADA**

E-Tuf™ Visual and Sound Barrier Systems are designed and manufactured in Edmonton, Alberta, Canada.

ENGINEERED TO BE LOW COST, LONG-LASTING, AND ATTRACTIVE

Built to last, E-Tuf™ Visual and Sound Barrier Systems are an attractive and professional addition to chain link fencing. This innovative system provides privacy for any type of industrial, commercial, or residential yard. The basic system provides a visual barrier for pedestrians and vehicle traffic which enhances security while the optional Sound Barrier adds a significant reduction in sound transmission.

An attractive addition to chain link fencing, E-Tuf™ Visual and Sound Barrier Systems have been designed to minimize material and installation costs while maintaining exceptional fit and finish. All components including the fastener system have been designed for wind loading and field tested in the harshest conditions. E-Tuf™ is an exceptional alternative to less effective and more expensive systems.
