

Monitoring & Maintenance of Fluid and Silt/Solids Containment Systems

ALBERTA-BASED WITH AN APEGA PERMIT TO PRACTICE

- **PROFESSIONAL ASSESSMENT**
Direct plant operations and construction work experience provides professional assessment of all containment systems.
- **PROFESSIONAL MONITORING**
We work with our clients to develop a system-by-system monitoring schedule and then inspect and log damage.
- **PROFESSIONAL MAINTENANCE**
Rely on us to identify and repair damaged or failing systems in the most efficient and cost effective manner.
- **HIGH QUALITY PRODUCTS AND PROFESSIONAL INSTALLATION**
All new liner and ESC systems meet industry/regulatory specs and are installed utilizing a comprehensive QA/QC program.

COST EFFECTIVE AND PROFESSIONAL ASSESSMENT, MONITORING, AND MAINTENANCE OF FLUID AND SILT/SOLIDS CONTAINMENT SYSTEMS

ECI is a professional organization providing monitoring/maintenance services, manufacturing, and installation/construction services in Western Canada.

Our Mission is to prevent environmental releases and unnecessary fines at your operating and construction sites by dovetailing a monitoring/maintenance program into your **Environmental Management System (EMS)**.

ECI monitors, maintains, supplies, and installs all types of geomembrane liner and Erosion & Sediment Control (ESC) systems for primary and secondary containment of fluids and silt/solids. Liner and ESC products include:

- LLDPE and HDPE liners
- TRWP liners
- PetroGard™ VI and XR-3/5 liners
- PVC and PVC alloy liners
- Silt Fence/Silt Socks
- Erosion Control Blankets
- Sump Filter Bags for Silt/Solids
