

Erosion & Sediment Control (ESC) & Soil Reinforcement

ALBERTA-BASED WITH AN APEGA PERMIT TO PRACTICE

- **HIGH QUALITY AND COST EFFECTIVE PRODUCTS**

All products meet municipal, provincial, and federal regulations.

- **PROFESSIONAL INSTALLATION**

Trained Technicians install our ESC products correctly as this is the primary cause of sediment releases.

- **PROFESSIONAL INSPECTION**

Trained Inspectors ensure systems are operating correctly and generate comprehensive reports.

- **PROFESSIONAL MAINTENANCE**

Rely on us to quickly and cost effectively repair damaged or failing systems before penalties and fines are levied.

COST EFFECTIVE AND PROFESSIONAL GEOSYNTHETIC PRODUCTS AND SERVICES

ECI is a professional manufacturing, installation, and inspection/maintenance services organization serving Western Canada. Our mission is to provide unsurpassed service with the lowest cost recommendations for any given application. Count on us to cost effectively reinforce your soils or in the case of ESC systems, prevent unnecessary penalties and fines at your construction and operating sites.

ECI supplies, installs, inspects, and/or maintains all forms of geosynthetics for use in erosion & sediment control and soil reinforcement applications.

Products include:
