

ECo-Armour™ Tank Skirts for Pad and Leak Detection System

ALBERTA-BASED WITH AN APEGA PERMIT TO PRACTICE

• HIGH QUALITY AND COST EFFECTIVE PRODUCTS

All geomembrane liners meet industry and regulatory specifications.

• PROFESSIONAL INSTALLATION

IAGI-Certified (International Association of Geosynthetic Installers) Technicians install our systems with strict QA/QC.

• PROFESSIONAL INSPECTION

Trained Inspectors ensure systems are damage and leak free and generate comprehensive reports.

• PROFESSIONAL MAINTENANCE

Rely on us to quickly and cost effectively repair damaged or failing liners before penalties and fines are levied.

COST EFFECTIVE AND BEST PRACTICE FOR TANK SKIRTS/APRONS

This waterproofing membrane system was custom-engineered specifically for this application and is the only of its kind. It keeps water out of tank foundations and leak detection liners while being extremely resilient to foot and equipment traffic.

ECo-Armour™ is the new best practice for tank foundation protection with the following advantages:

- Impermeable to water.
- Proprietary engineered tank base fastening and caulking system.
- 50 year UV/Weathering life with low/no maintenance.
- Durable non-slip surface.
- Can be installed at -40 C.
- Crisp, clean, and attractive.
- Not hazardous to the environment like sprays/emulsions.
- For new or existing tanks.
- Easily repaired if damaged.
